Professional Summary

Software Engineer with nearly **3 years of experience** in developing enterprise applications using **Java, Spring Boot, React.js, REST APIs, Microservices, and MySQL**. Experienced in **HRMS, fintech platforms, payment gateway integration, backend development, and SQL optimization**. Strong knowledge of **Spring Security, Hibernate, JPA, JWT authentication, OAuth2, Kafka, JUnit, Swagger, Docker, AWS, Git, and Jenkins**.

Technical Skills

Languages: Java 8, SQL, JavaScript, Python

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, Microservices, Apache Kafka, Swagger

Frontend: React.js, JavaScript, HTML5, CSS3

Databases: MySQL, MongoDB

Cloud & DevOps: AWS EC2, S3, RDS, Docker, Jenkins, Git, Maven

Security: JWT Authentication, OAuth2, Role-Based Access Control

Testing & Logging: JUnit, Unit Testing, Logging

Core Concepts: OOP, Collections Framework, Exception Handling, SQL Optimization, Debugging

Professional Experience

Software Engineer

Jun 2026 – Present

Saigun Technologies Pvt. Ltd., New Delhi

Project: Empxtrack – Enterprise HRMS Platform

- Developing and enhancing modules for **Empxtrack**, an enterprise HRMS platform used for attendance, leave, payroll, employee lifecycle, workflow, and workforce management.
- Implementing business requirements using **Java, Spring Boot, JavaScript, SQL, HTML, and CSS**.
- Working on attendance, timecard, employee reporting, payroll, and workflow-related modules.
- Writing and optimizing SQL queries for employee attendance, reporting, payroll, and workflow data processing.
- Debugging issues, analyzing existing code flow, and improving application stability and performance.
- Implementing validation logic, status handling, report changes, and UI/backend enhancements based on business requirements.
- Collaborating with senior developers, QA teams, and business stakeholders for requirement understanding, code review, and delivery.

Software Engineer – Full Stack Developer

Nov 2023 – May 2026

V Vang Solutions Pvt. Ltd., New Delhi

Project: Payvang Aggregator – Fintech Payment Platform

- Developed and maintained backend services using **Java 8, Spring Boot, REST APIs, Microservices, Hibernate, JPA, and MySQL**.
- Integrated **Cashfree and Razorpay payment gateways** for order creation, payment verification, transaction tracking, and webhook handling.
- Implemented secure authentication and authorization using **Spring Security, JWT, and role-based access control**.
- Designed REST APIs for payment processing, user management, reporting, and transaction status management.
- Optimized MySQL queries, database schemas, and backend workflows to improve API performance and reliability.
- Used **Java Collections Framework and Streams API** for business logic, transaction processing, and data transformation.
- Containerized applications using **Docker** and deployed backend services on **AWS EC2**.
- Worked with frontend teams using **React.js, JavaScript, HTML, and CSS** to deliver end-to-end features.

Project: VangoGames – HTML5 Gaming Platform

- Developed full-stack features for an **HTML5 gaming platform** using **React.js, Spring Boot, REST APIs, and MySQL**.
- Built responsive React.js dashboards for signup, login, profile management, gameplay access, and reward tracking.
- Implemented user onboarding flow, game session handling, user activity tracking, and reward-based engagement features.
- Designed backend logic for coin rewards, incentive management, and future redemption workflows.

- Optimized SQL queries and transactional workflows for performance, consistency, and scalability.

Java Developer Intern

Sept 2022 – Nov 2022

ThinkNext Technologies Pvt. Ltd., Mohali

- Developed backend components using **Core Java, Java 8, Spring MVC, Hibernate, and SQL**.
- Implemented business logic using OOP concepts and Java Collections Framework.
- Performed database operations, SQL query writing, debugging, and testing of Java-based applications.

Project

Cashfree Payment Gateway Integration

Spring Boot, MySQL, REST APIs, Webhooks

Source Code

- Developed a secure payment processing backend using **Spring Boot and Cashfree REST APIs**.
- Implemented order creation, payment verification, webhook handling, and payment status tracking.
- Stored order and transaction details in MySQL and handled success, failed, and pending payment scenarios.
- Deployed the application on **AWS EC2**.

Education

Bachelor of Technology in Computer Science

2019 – 2023

Uttarakhand Technical University

Certifications

- Java Internship Completion – ThinkNext Technologies
- Python Basics – Infosys
- React JS Training Completion
